

ANTLER CHICORY

Chicory is an herb and develops a rather deep tap-root that prefers loamy, well-drained soils. While chicory was originally used as a coffee substitute, it has now become a dynamic tool in food plots for land managers. For a change of pace, try growing chicory, a tough cool-season perennial crop that is a preferred deer forage, in your next fall food plot.

WGF

OPEN POLLINATED SORGHUM WILD GAME FOOD USAGE

Wild Game Food is an early-maturing sorghum that is 24-34 inches in height. The seed becomes palatable at maturity and is readily consumed by quail, turkey, pheasant, prairie chicken, as well as migratory birds and deer. Mid-bloom 43 to 50 days. Mature seed 85 to 100 days.

Rows: 10 pounds per acre

Drill: 25-30 pounds per acre

Broadcast: 25-30 pounds per acre

UPLAND GAME BIRD MIX
