

PREMIUM LAWN MIX

4 TO 6 POUNDS PER 1000 SQ. FT.

Premium lawn mix is a grass mixture that gives you a healthy, attractive lawn with a combination of sun and shade tolerance. We have just enough fine leaf perennial ryegrass to get your lawn off to a fast start. Kentucky bluegrass and creeping red fescue will continue to fill in and form a dense sod that will give you that quality appearance. This mix is recommended for all applications and will do especially well under intensive lawn practices.

60% Kentucky Bluegrass

25% Fine Leaf Perennial Rye

15% Creeping Red Fescue

ENDURANCE LAWN MIX

8 TO 10 POUNDS PER 1000 SQ. FT.

Endurance lawn mix gives you exactly what the name says – a lawn that will endure. We have added enough perennial rye to give you that fast start, tall fescue to keep your lawn green when others have gone dormant and Kentucky bluegrass to help fill in and give you that dense full lawn. Tall fescue blades are slightly wider than perennial rye or Kentucky bluegrass but will blend in nicely if you keep the seeding rate at recommended levels. Tall fescue has a much deeper root system that keeps it green during drought stress, requiring less water and fertility. It will tolerate shade and is widely used for athletic areas. Endurance lawn mix should be planted in spring or very early fall to allow tall fescue to develop root system before winter.

70% Fine Leaf Turf Type Tall Fescue

10% Concerto Kentucky Bluegrass

10% Fine Leaf Perennial Rye

10% Creeping Red Fescue

THREE WAY LAWN MIX

6 TO 7 POUNDS PER 1000 SQ. FT.

Economy lawn mix for those areas not requiring the higher quality Kentucky bluegrass. Perennial ryegrass establishes quickly with creeping red fescue and Kentucky bluegrass completing the lawn. This mixture does well in sun and shady areas, but will create more thatch than either Premium Lawn or Endurance Lawn mixes.

33 1/3% Concerto Kentucky Bluegrass

33 1/3% Fine Leaf Perennial Rye

33 1/3% Creeping Red Fescue
